Aruba Technology update: Wi-Fi 6

Geeta Kulkarni

WLAN Competitive TME
HPE ARUBA

AGENDA

- Trend and challenges
- Wi-Fi 6 Features
- Benefits of Wi-Fi 6
- Aruba's Wi-Fi 6 CERTIFIED Indoor AP portfolio
- Advantages of AOS 8
- AOS 8 Customer Blogs

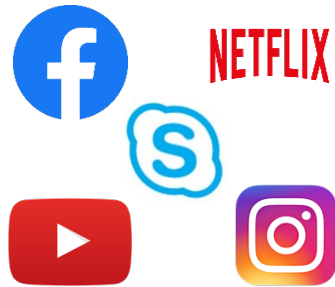

Trends and challenges

The background features a vibrant orange and red color palette. Large, curved shapes in these colors create a dynamic, abstract composition. In the lower right quadrant, a series of horizontal blue lines are arranged in a fan-like pattern, radiating from a point towards the right edge of the frame.

Need for Wi-Fi 6

**GROWTH IN
DEVICES**

**DIVERSITY OF
APPLICATIONS**

**INCREASED
UPSTREAM TRAFFIC
DUE TO USER
UPLOADS
AND GROWING USER
EXPECTATIONS**

**IOT
CONNECTIVITY**

Wi-Fi 6 Features

The background features a vibrant orange and red color palette. Large, curved shapes in these colors create a dynamic, abstract composition. In the lower right quadrant, a series of horizontal blue lines are stacked, creating a sense of depth and movement.

ENHANCEMENTS IN Wi-Fi 6

802.11ax or High-Efficiency Wireless

8x8
MU-MIMO
DL/UL

OFDMA
DL/UL

1024 QAM

2.4 GHz 5 GHz

Increased Efficiency

Increased Performance

ENHANCEMENTS IN Wi-Fi 6

802.11ax or High-Efficiency Wireless

Target Wake Time (TWT)

BSS color

Extended Range
for outdoor with longer GI

Long OFDM Symbol

Better power
saving
mechanism

Better media
access
mechanism

Increase in data rate and
range

Benefits of Wi-Fi 6

The background features a vibrant orange and red color palette. Large, curved shapes in these colors create a dynamic, abstract composition. In the lower right quadrant, a series of horizontal blue lines are stacked, creating a sense of depth and movement.

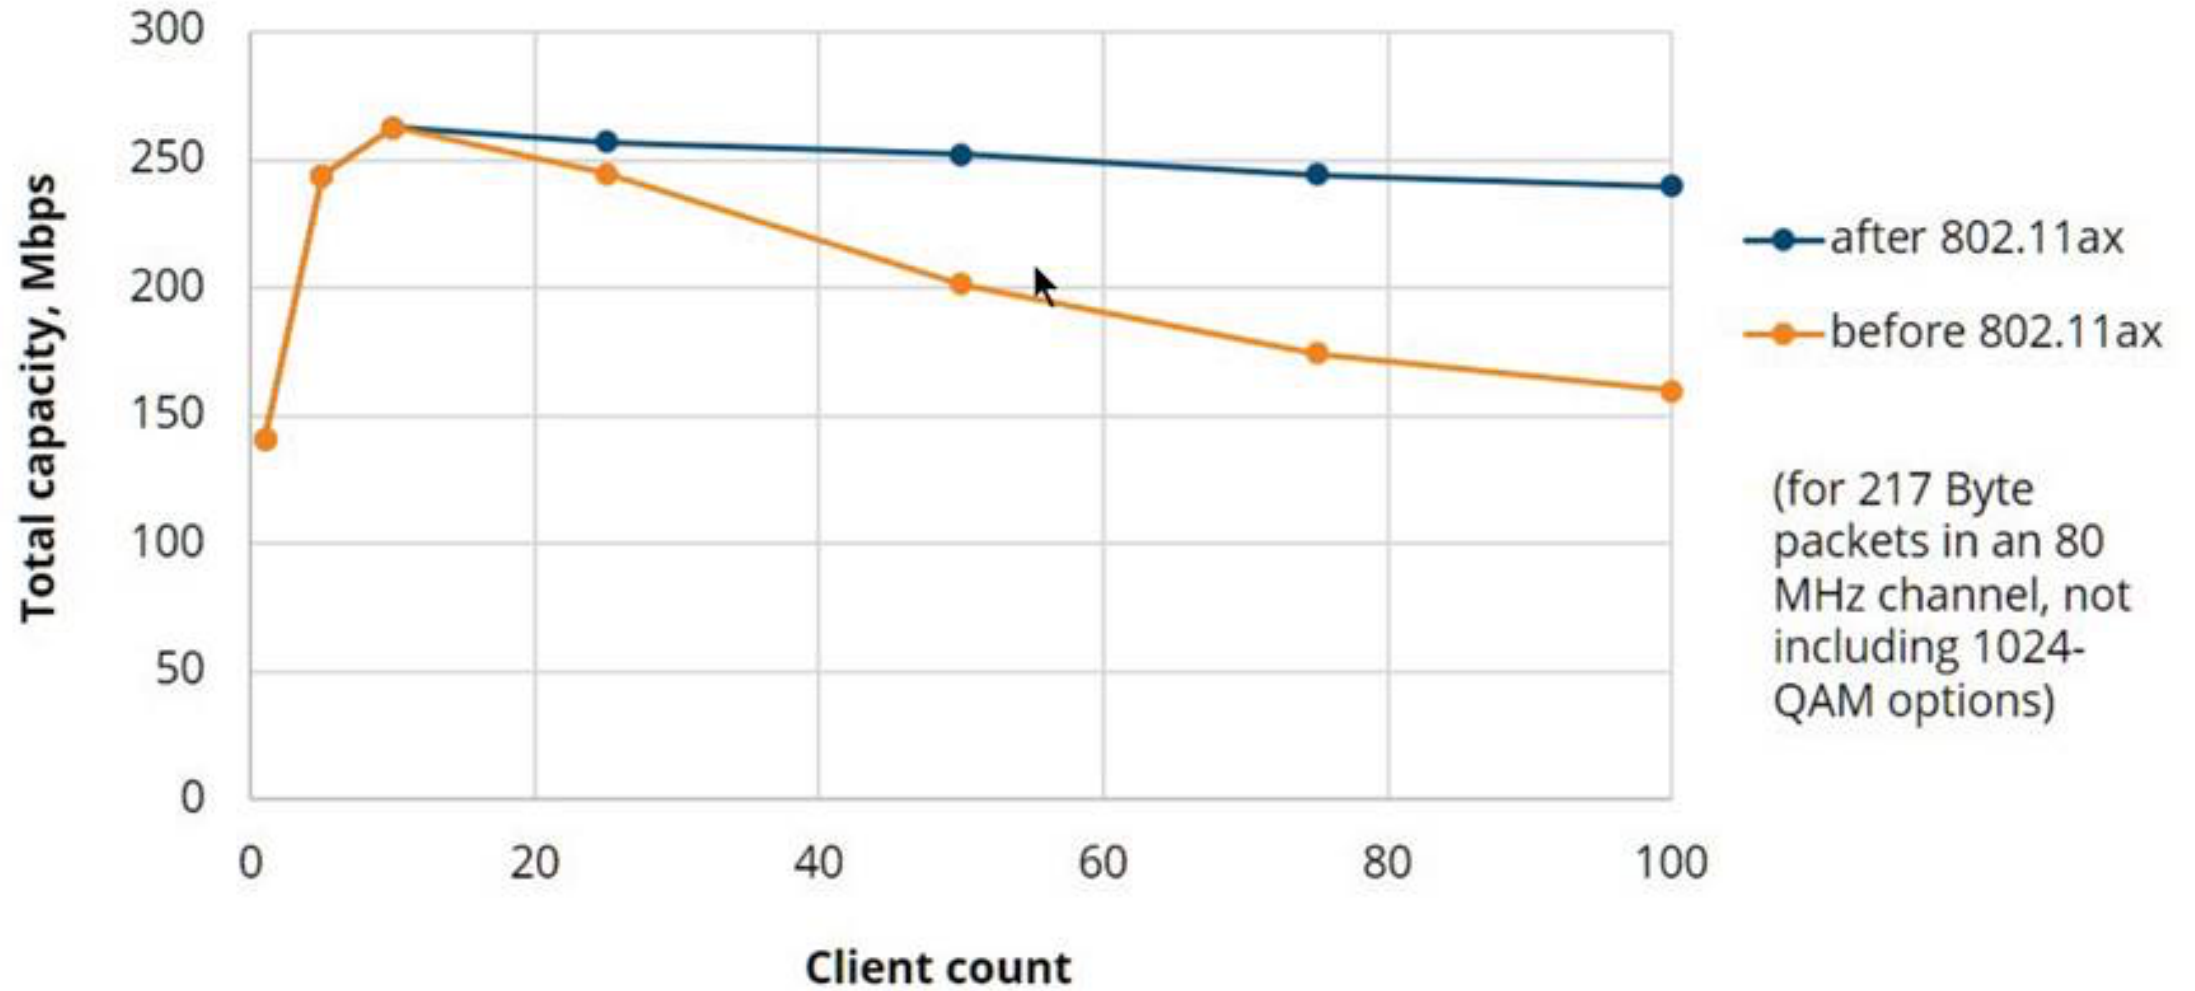

BENEFITS OF Wi-Fi 6

802.11ax or High-Efficiency Wireless

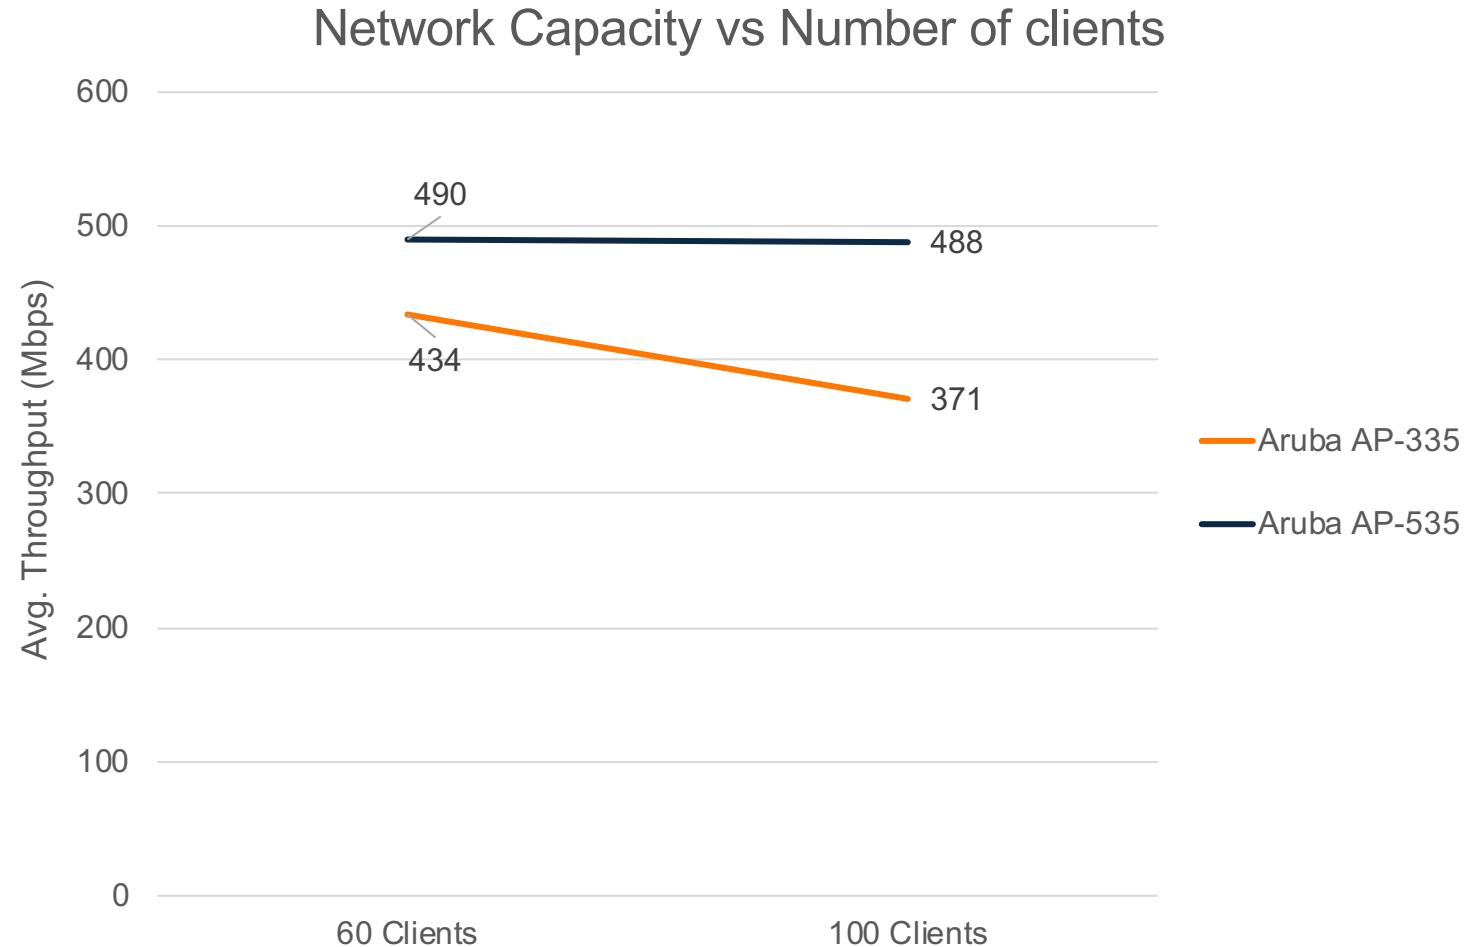

Feature	Improvements over 802.11ac
New OFDM symbol	20% higher data rates over 802.11ac
OFDMA downlink & uplink	~ 3x system capacity for short packets or many clients
MU-MIMO downlink and uplink for up to 8 clients	~ 2x capacity over 802.11ac
Spatial re-use (BSS color)	~ 2x capacity over 802.11ac
High-order modulation 1024 QAM	25% over 802.11ac
Target Wait Time	~ 3-10x battery life
20 MHz – only client option	Lower cost chips
Special preamble for long links	~ 2x more range for a given data rate
Long guard interval option	Allows a 1km difference in multipath without self-interference (vs 250m)

Network (BSS) capacity vs number of clients

Throughput Results AP-335 (Wi-Fi 5) vs AP-535 (Wi-Fi 6)

The above tests were performed using 11ac Clients with 1460 B TCP packet on 80 MHz wide SSID

ARUBA Wi-Fi 6 ALSO INCLUDES ADVANCED SECURITY CAPABILITIES

- **Wi-Fi CERTIFIED WPA3**
- **Wi-Fi CERTIFIED Enhanced Open**
- **Aruba Air Slice**
- **Aruba Policy Enforcement Firewall**

Wi-Fi 6 CERTIFIED COMPLETE INDOOR PORTFOLIO

High performance

Incredible efficiency

Enhanced protection

**ARUBA 500
SERIES**

**AI
POWERED**

**ARUBA 510
SERIES**

**SLA-GRADE
ASSURANCE**

**ARUBA 530
SERIES**

**CLOUD OR
ON-PREMISES**

**ARUBA 550
SERIES**

RELIABILITY

TRUST

INTEROPERABILITY

Advantages of AOS 8

- **Always-on network with no downtime**
- **More intelligence and automation**
- **Simplified operation**
- **Enhanced security**
